"Hello! My name is Tyler and you can call me Pei (because it is a very rare last name in my country, so it is easy to recognize, and most of my friend call me Pei.) I am 15 years old. I am currently studying in a Private high school as a 10th grader in Taiwan. I am a very challengeable, open minded, adaptable, polite, and bright person. I will be an exchange student in your home and thank you for your kindness, hope you are excited as I am.

The reason why I would like to be an exchange student is because of the recommendation from my mother's colleague. The uncle's daughter was an exchange student in the US before and they suggest me to attend the orientation for Exchange student, they say there are many countries to choose. I got curious, so I went to the orientation and heard a student back from Sweden sharing her experience about all the things in Sweden and I have a lot of ideas about what to do in Sweden. For example, I want to know your daily life, church life, and holiday life. I also want to join basketball, baseball, table tennis and swimming teams in the Sweden high school. I hope to have host brother that we can hang together after class and a host sister that is patient enough to teach me Swedish. I believe that I will become more independent and confident and gain a lot from being an exchange student. On the other hand, during the coming one year, I will try my best to share my cultures to you, like Chinese traditional festivals, Chinese delicious food, Chinese game, and anything you would like to know.

I love to make friends, and I like to talk; I already have enough experience to live without my parents, because I study at a boarding school. Maybe I would be shy in the beginning when I in a new environment. However, I am easy to get along with, so I will be talkative soon. Like playing basketball, surfing and shopping the most of the free time. I am good at P.E at school; I also like practicing English, such as reading novels, magazines or listening to English songs (I like singing songs, but I don't know if my voice is good or not). I also like playing soccer, baseball and swimming. I am an outdoor boy, I want to be a businessman or an athlete in the future, and I hope I can stay in a host family which has many people, so there always someone to talk to or something to do, and I definitely need help with learn Swedish.

I was born in a full of love family. They are four members in my family – my parents, a younger sister and I. Both my parents work in cosmetology and they travel a lot for business. My sister is a 12 years girl and she is studying in elementary school. We love each other very much; our family usually takes a trip together every long weekends or special holidays.

I will stay at your home during the coming year I think we will be happy to know each other and live together happily. I can tell you about my country, Taiwan; and share our culture and Chinese food to you.

Kind regards,

Tyler"
